Elemental roof tiles

Australian made

Visually your roof contributes significantly to the overall look of your home

Don't stick to the straight & narrow
Create your look with roof tiles

What Roof Style Are You?

Choosing the right roof tile is a great way to add distinction, character and value to your home. To help choose the right tile for your home, consider the following...

CLASSIC

Traditional tiles with lapped ridging. What makes a classic? Styling that has stood the test of time and continues to do so, like our Hacienda tile.

CONTEMPOR

Flat tiles with a streamlined call it A-Line ridging and it with our Horizon tiles. Flat the perfect roof choice for design.

The Benefits of Roof Tiles

Sound reducing properties for a quieter home

Salt Safe - perfect for coastal locations

Will not rust, warp or corrode

Thermal insulation properties - saving you money on heating and cooling

Impervious to frost and ice

Tank water safe

As with all water collection from roofs, always consider atmospheric fallout.

Sarking

You only get one chance to install sarking and that is when you install a new roof.

What is it?

Sarking is a flexible membrane that is laid under the roof battens during roof installation. It helps to protect your home from the elements and improves the overall insulation of the roof.

Should you choose terracotta tiles, the colour will never fade.

Oyster	Windspray®
Sambuca	Monument®
Tapenade (multi)	Monument®
Wild Rice	Evening Haze®

monierprime™ do not guarantee a match to COLORBOND® steel products. The above table serves as a guide only. We recommend tile samples are viewed alongside actual COLORBOND® product samples for accurate matching.

How Tiles Compare

WARRANTY

Concrete roof tiles come with a 20 year warranty against warping, cracking, leakage and damage by salt and frost. In addition, terracotta tiles have a 50 year colour fast warranty.

NOISE REDUCTION

Roof tiles have a noise reduction rating of 30 decibels against general external noise. The most common roofing alternative has a noise reduction rating of 12 decibels against general external noise.

CHOICE

Roof tiles give you a choice of different profiles in a range of colours.

LONGEVITY

Tile roofs have been known to remain serviceable for 100 years and longer.

MAINTENANCE

Tile roofs require little or no maintenance even in high salt concentration areas. Roofs made from alternative roofing materials may need to be washed if they aren't regularly exposed to rain.

FIRE PROTECTION

Non-combustible materials like terracotta and concrete provide excellent protection against radiant heat from bush fires. Tile roofs have been tested and pass the requirements of AS3959-2009 for fire zone construction.

STORM ENDURANCE

Terracotta and concrete roof tiles offer more resistance to wind suction than lighter weight materials.

REPAIR COSTS

If damage is sustained during a storm, you need only replace the individual damaged tile.

Important Tile Information

Concrete roof tiles are created from controlled formulation of raw materials extruded under high pressure to achieve the tile's strength and resistance to weather. The colour applied and/or incorporated into the body is purely decorative. When first installed concrete tiles may exhibit some discolouration caused by the migration of naturally occurring concrete salts to the surface of the tile. This is known as efflorescence. This is more notable in the Stirling profile due to the tile design and aesthetic. All other concrete tiles are expected to return to an even, matte appearance over time.

Terracotta tiles are created by firing natural clay in high temperatures. Glazed tiles have ceramic materials and oxides added to the body or surface of the tile. Each tile may vary in shades. The most attractive roofs are created by blending these shades throughout the roof during installation.

All tiles contain small blemishes. During transportation and installation other blemishes such as scuffing and chip marks occur. These will not detract from the weather performance of the tile and are not considered a product fault.

monierprime™ endeavour to supply tiles similar or as near to displayed product, however no responsibility will be accepted for any variations.

Roof tile colours in this brochure have been reproduced as faithfully as possible. Actual colours may vary due to the printing process. monierprime™ urge all customers to view actual tile samples before making a decision.
